

Today, more than 210 million Americans nationwide receive drug benefits administered by PBMs that are primarily responsible for processing and paying prescription drug claims and for developing and maintaining the formulary, contracting with pharmacies, and negotiating discounts and rebates with drug manufacturers.

Prime's industry tested PBM solutions are helping healthcare organizations drive cost reduction and revenue enhancement through improved efficiency and effectiveness and process transformation of 340 B, Clinical Program Management, and Revenue Cycle Management.

PharmaPlus™ is a robust framework that accelerates the implementation of an enterprise Pharmacy Benefit Management (PBM) solution. The framework is a structured tool enabling quick and proficient construction and deployment of PBM solutions for retail and mail order Pharmacies, Third Party Administrators (TPAs) of prescription/discount drug programs and Managed Care Providers. It contains built-in features such as Business Objects, Interfaces, Plug-Ins, Dashboards, and Wizards to simplify solution development and deployment. Incorporated in the framework is functionality for managing the core aspects of prescription drug benefit plan management including:

Prime's PBM Functionality are:

- Formularies of preferred medicines
- Drug manufacturer discounts and rebates
- Pharmacy networks
- Pharmacy orders and inventory
- Claims Processing
- Claims Reconciliation and Adjudication
- Order Management
- Billing/Invoicing
- Plan Design
- EDI Transactions
- Visual Dashboards/Reporting

Delivering **successful, Reliable, Cost-effective** solutions
