PRIME INTRODUCES INTEGRATED HEALTHCARE EMR/EHR SOLUTIONS

September 1, 2014 (Wayne, PA)—Prime Technology Group, LLC a global information technology provider, announces its electronic health records / clinical integration system software services which provide integrated and certified electronic health records system care via EMR and EHR solutions from its EHR/EMR healthcare technology stables.

Under its new EMR and EHR software service offerings, the product suite is visualized for specialty medical practices of all sizes. The software allows practices to implement an Electronic Health Record (EHR) and Electronic Medical Record (EMR) solution that optimizes the physician experience, while including registration, claims, billing, scheduling, and collections.

According to a spokesman,

for the Prime Technology Group, LLC : *“The healthcare EMR and EHR solutions interface is simple, powerful, and is built to think like you do. The electronic records are made accessible, in a collective form, to authorized clinicians, specialists, medical practitioners, and other medical staff engaged in the individual’s health and treatment. Our EHR/EMR software solutions provide not only practice management software but also integrated electronic health records system that incorporates EHR software, mobile EHR solutions, a care portal, analytics and communication options to fit a wide range of specialties including Cardiology, Internal Medicine, Pain Management, Pediatrics to name only just a few.”*

Sudhakar Goverdhanam, Chief Executive Officer (CEO) of Prime Technology Group adds: *“Our objective is to provide physicians and medical center staff access to critical and multiple sources of data, thereby enhancing performance and bringing efficiency as far as patient care is concerned. Our cost-effective healthcare solutions bring results in increased patient satisfaction and reduced operations cost.”*
